

Publikationsliste Prof. Dr. med. Dirk Graf

Originalarbeiten

1. Rohde D, Wiesner C, Graf D, Wolff J, Fuzesi L, Jakse G. Interstitial fluid pressure is increased in renal cell carcinoma xenografts. *Urol Res* 2000; 28:1-5.
2. Kurz AK, Block C, Graf D, vom Dahl S, Schliess F, Häussinger D. PI 3-kinase dependent Ras activation by tauroursodesoxycholate in rat liver. *Biochem J* 2000; 350: 207-213.
3. Kurz AK, Graf D, vom Dahl S, Schmitt M, Häussinger D. Tauroursodeoxycholate-induced choleresis involves dual MAP kinase activation and translocation of the bile salt export pump (Bsep) to the canalicular membrane. *Gastroenterology* 2001; 121: 407-419.
4. vom Dahl S, Schliess F, Graf D, Häussinger D. Role of p38(MAPK) in cell volume regulation of perfused rat liver. *Cell Physiol Biochem* 2001; 11: 285-94.
5. Graf D, Kurz AK, Fischer R, Reinehr R, Häussinger D. Tauroolithocholic acid-3 sulfate induces CD95 trafficking and apoptosis in a c-Jun N-terminal kinase dependent manner. *Gastroenterology* 2002; 122: 1411-1427.
6. Reinehr R, Graf D, Fischer R, Schliess F, Häussinger D. Hyperosmolarity triggers CD95 membrane trafficking and sensitizes rat hepatocytes toward CD95L-induced apoptosis. *Hepatology* 2002; 36: 602-14.
7. Graf D, Kurz AK, Reinehr R, Fischer R, Kircheis G, Häussinger D. Prevention of bile acid-induced apoptosis by betaine in rat liver. *Hepatology* 2002; 36: 829-839.
8. Lornejad-Schäfer MR, Schäfer C, Graf D, Häussinger D, Schliess F. Osmotic regulation of insulin-induced mitogen-activated protein kinase phosphatase (MKP-1) expression in H4IIE rat hepatoma cells. *Biochem. J.* 2003; 371: 609-19.
9. Häussinger D, Kurz AK, Wettstein M, Graf D, vom Dahl S, Schliess F. Involvement of integrins and Src in tauroursodeoxycholate-induced and swelling-induced choleresis. *Gastroenterology* 2003; 124: 1476-1487.

10. Graf D, Reinehr R, Kurz AK, Fischer R, Häussinger D. Inhibition of tauro lithocholate 3-sulfate-induced apoptosis by cyclic AMP in rat hepatocytes involves protein kinase A-dependent and -independent mechanisms. Arch. Biochem. Biophys. 2003; 415: 34-42.
11. Reinehr R, Graf D, Häussinger D. Bile salt-induced hepatocyte apoptosis involves epidermal growth factor receptor-dependent CD95 tyrosine phosphorylation. Gastroenterology 2003; 125: 839-53.
12. Graf D, Kohlmann C, Haselow K, Gehrmann T, Bode JG, Häussinger D. Bile acids inhibit IL-6 signaling via gp130 receptor dependent and –independent pathways in rat liver. Hepatology 2006; 44: 1206-1217.
13. Becker S, Reinehr R, Graf D, vom Dahl S, Häussinger D. Hydrophobic bile salts induce hepatocyte shrinkage via NADPH oxidase activation. Cell. Physiol. Biochem. 2007; 19: 89-98.
14. Mannack G, Graf D, Donner MM, Richter L, Gorg B, vom Dahl S, Häussinger D, Schliess F (2008). Tauro lithocholic acid-3 sulfate impairs insulin signaling in cultured rat hepatocytes and perfused rat liver. Cell. Physiol. Biochem. 2008; 21: 137-50.
15. Graf D, Haselow K, Münks I, Bode JG, Häussinger D. Caspase-mediated cleavage of the signal-transducing IL-6 receptor subunit gp130. Arch. Biochem. Biophys. 2008; 477, 330-338.
16. Boini KM, Graf D, Kuhl D, Häussinger D, Lang F. SGK1 dependence of insulin-induced hypokalemia. Pflugers Arch. 2009; 459, 955-961.
17. Boini KM, Graf D, Hennige AM, Koka S, Kempe DS, Wang K, Ackermann TF, Föller M, Vallon V, Pfeifer K, Schleicher E, Ullrich S, Häring HU, Häussinger D, Lang F. Enhanced insulin sensitivity of gene targeted mice lacking functional KCNQ1. American Journal of Physiology Regul Integr Comp Physiol 2009; 296, 1695-701.
18. Graf D, Haselow K, Münks I, Bode JG, Häussinger D. Inhibition of interferon- α -induced signaling by hyperosmolarity and hydrophobic bile acids. Biol Chem. 2010; Oct;391(10):1175-87.

19. Kubitz R, Bode J, Erhardt A, Graf D, Kircheis G, Müller-Stöver I, Reinehr R, Reuter S, Richter J, Sagir A, Schmitt M, Donner M. Cholestatic liver diseases from child to adult: the diversity of MDR3 disease. *Z Gastroenterol*. 2011 Jun;49(6):728-36.
20. Haselow K, Bode JG, Wammers M, Ehltng C, Keitel V, Kleinebrecht L, Schupp AK, Häussinger D, Graf D. Bile acids PKA-dependently induce a switch of the IL-10/IL-12 ratio and reduce proinflammatory capability of human macrophages. *J Leukoc Biol*. 2013 Dec;94(6):1253-64.
21. Sagir A, Glaubach B, Sahin K, Graf D, Erhardt A, Oette M, Häussinger D. Transient Elastography for the detection of liver damage in Patients with HIV. *Infect Dis Ther*. 2015 Sep; 4:355-364.
22. Ehltng C, Trilling M, Tiedje C, Le-Trilling VT, Albrecht U, Kluge S, Zimmermann A, Graf D, Gaestel M, Hengel H, Häussinger D, Bode JG. MAPKAP kinase 2 regulates IL-10 expression and prevents formation of intrahepatic myeloid cell aggregates during cytomegalovirus infections. *J Hepatol*. 2016 Feb; 64:380-389
23. Schupp AK, Trilling M, Rattay S, Khanh Le-Trilling VT, Haselow K, Stindt J, Zimmermann A, Häussinger D, Hengel H, Graf D. Bile Acids Act as Soluble Host Restriction Factors Limiting Cytomegalovirus Replication in Hepatocytes. *J Virology* 2016 90: 6686-98
24. Göbel T, Graf D, Hosnowsky C, Blondin D, Knoefel WT, Häussinger D, Erhardt A. Multimodal and sequential treatment improves survival in patients with hepatocellular carcinoma. *Z Gastroenterol*. 2017 Mar;55(3):251-259.
25. Wammers M, Schupp AK, Bode JG, Ehltng C, Wolf S, Deenen R, Köhrer K, Häussinger D, Graf D. Reprogramming of pro-inflammatory human macrophages to an anti-inflammatory phenotype by bile acids. *Sci Rep*. 2018 Jan 10;8(1):255. doi: 10.1038/s41598-017-18305-x.
26. Rattay S, Graf D, Kislat A, Homey B, Herebian D, Häussinger D, Hengel H, Zimmermann A, Schupp AK. Anti-inflammatory consequences of bile acid accumulation in virus-infected bile duct ligated mice. *PLoS One*. 2018 Jun 28;13(6):e0199863. doi

Übersichtsartikel

1. Häussinger D, Graf D, Weiergräber OH. Glutamine and cell signaling in liver. J Nutr 2001; 131: 2509-14.
2. Graf D, Bode JG, Häussinger D. Caspases and receptor cleavage. Arch. Biochem. Biophys. 2007; 462: 162-170.
3. Lang PA, Graf D, Boini KM, Lang KS, Klingel K, Kandolf R, Lang F. Cell volume, the serum and glucocorticoid inducible kinase 1 and the liver. Z Gastroenterol. 2011 Jun;49(6): 713-9.
